

Bailey's Court Primary School

Reception's Medium Term Planning

Spring 1 - Our Wonderful World

Early Years Foundation Stage Framework

As Writers, we will explore a range of fiction and non-fiction texts including Supertato and Penguins. We will learn how to write simple CVC words using sounds learnt from Basics 2 and 3 and begin to write short phrases and captions.

As Readers, we will continue to learn how to segment and blend sounds in words in order to read. We will be learning the Basics 3 phonemes and Tricky Words following the Supersonic Phonic Friends scheme.

As Mathematicians, we will continue to subitise within 5 as well as matching numerals to quantities. We will also be comparing sets and using language of comparison such as: *more than, fewer than, an equal number to*.

As Geographers, we will investigate maps and use them to compare where things are within our community. We will also use technology such as BeeBots to explore directions.

As Chefs, we will be cooking up our very own Stir Fry!

As Musicians, we will learn to listen to the beat of music and show the beat with actions. We will also have the opportunity to play along to the music using percussion instruments and perform our own sound story as a class.

As Historians, we will explore old and new buildings.

As Artists, we will explore the art of Yayoi Kusama's. We will then create our own artwork inspired by her famous polka dot designs.

As Scientists, we will explore different materials and discuss the importance of recycling. We will also recognise, talk about and know the changes that occur in winter.

As Designers, we will make use of our PlayPod resources to build models that will support us when role playing characters in stories we have been learning.

As Theologians, we will explore religious beliefs in a thoughtful way. We will learn about different festivals and celebrations that take place around the world including Chinese New Year and the Lantern Festival.

In PE, we will develop our control and balance through Gymnastics. We will explore ways to jump, land, roll and move safely with increased confidence.

In Computing, we will explore computing systems by programming Bee-Bots to move and turn accurately along a route.

Our theme in **PSHE** this term is '**Taking on Challenges**'. We will think about why we have rules, the importance of persistence and perseverance in the face of challenges, learn to communicate effectively with others and learn new skills that will help us show resilience and perseverance in the face of challenge.
